CIT 140 · Week 6 · System boundary

Replace prompts. Use W06-S01 for the system, external teams and data crossing the boundary. Keep internal stores on page 2. Add labeled connectors.

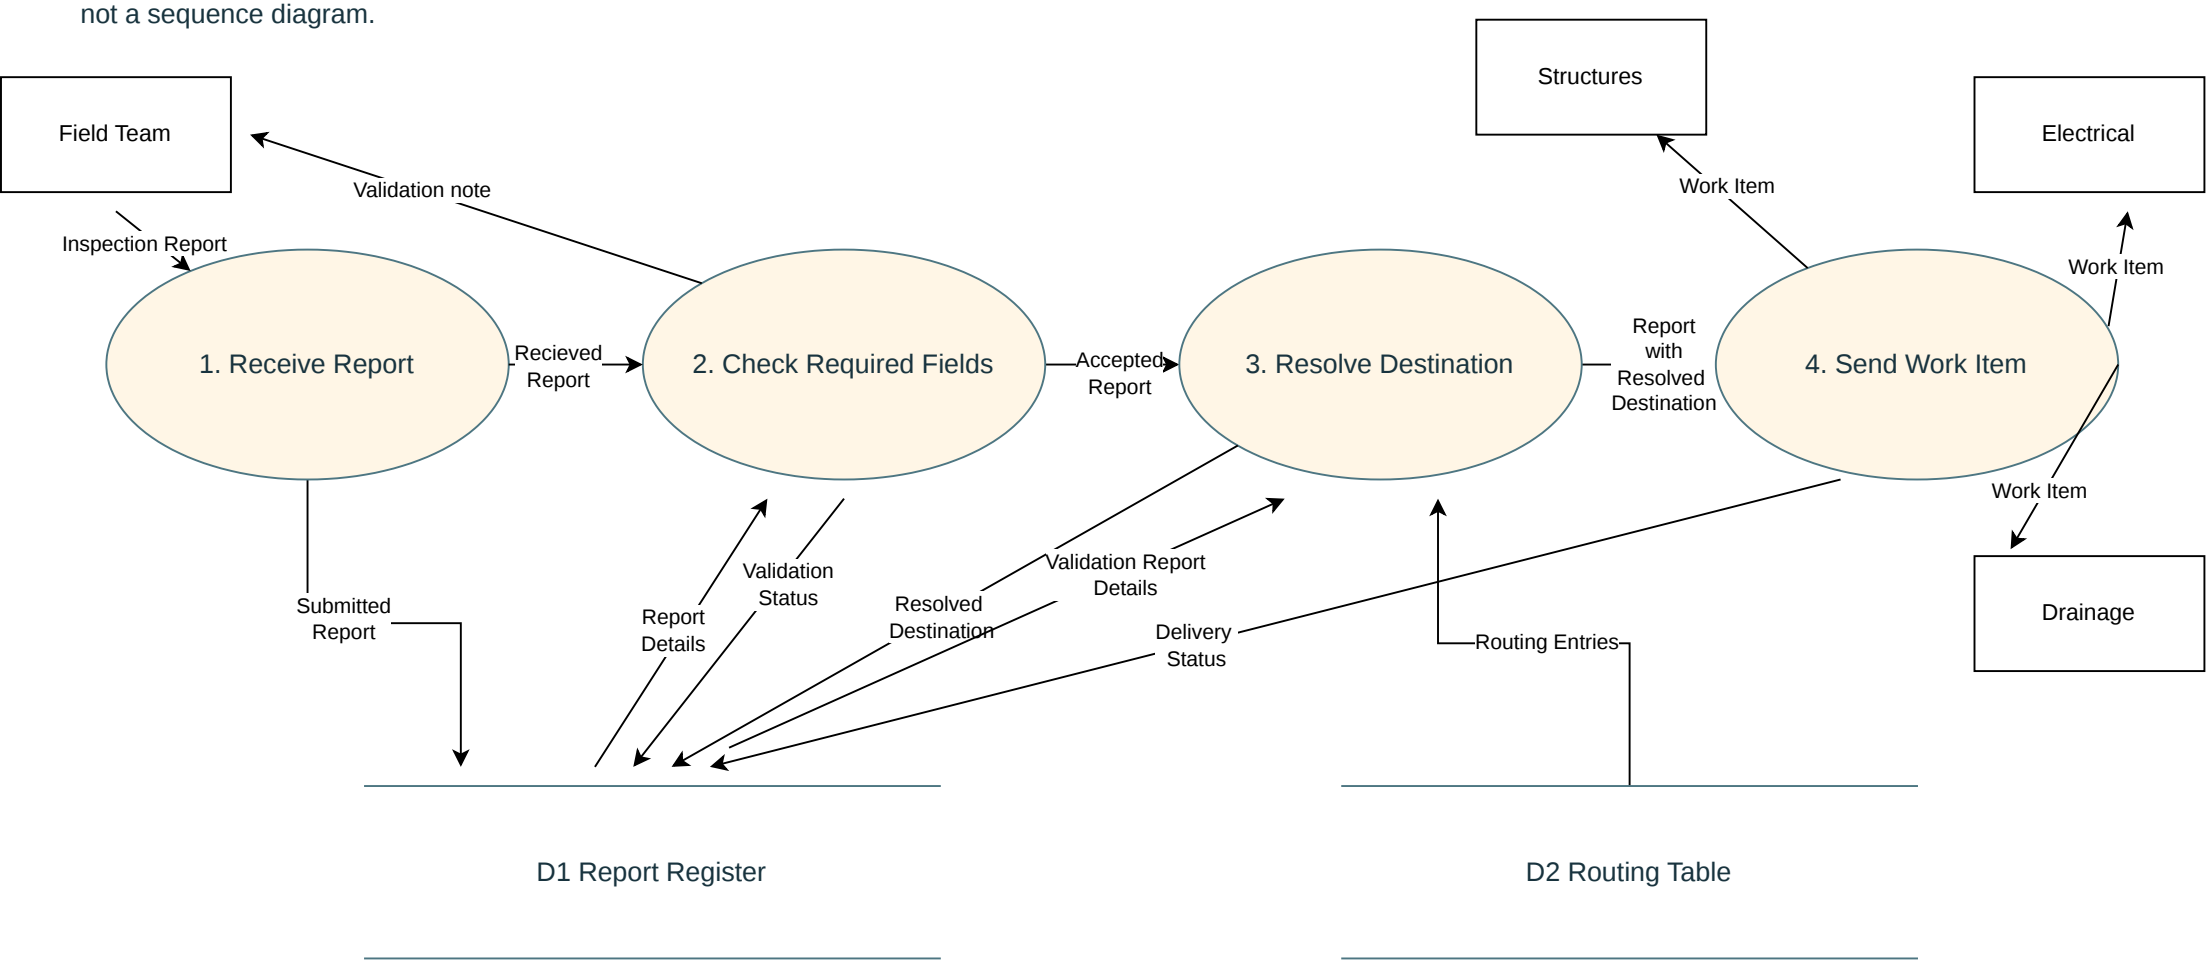

Inside: Receiving, validating, routing and recording inspection reports.

Outside: Field Team submits reports. Electrical, Drainage and Structures perform repairs. Flight control, physical inspections and table maintenance are outside the system.

CIT 140 · Week 6 · Information movement

Use W06-S01. Connect the four processes, two stores and external teams. Label arrows with data; balance external flows with page 1. The starter positions are a layout aid, not a sequence diagram.

survey_area	Area where the inspection occured	NORTH	NORTH, CENTRAL or SOUTH	W06-S02

Finding: Report CJ-603 is a BRIDGE inspection (W06-S02). The approved policy requires it to go to Structures (W06-S03) but the delivery shows it went to Electrical(W06-S04). The records show a routing discrepancy but don't establish its cause.

Unanswered question: What routing table entries or system configuration were active when report CJ-603 was processed and could they explain why it went to Electrical instead of Structures?
